## Parent Corner

Talking to our children about tragic events.

Presented by Mr. Rogers

"When children bring up something frightening, its helpful right away to ask what they know about it. We often find that their fantasies are very different from the actual truth. What children probably need to hear most from us adults is that they can talk to us about anything and that we will do all we can to keep them safe in any scary time. I'm always glad to be your neighbor."
